DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 20-21, drawn to a system for purifying exhaust gas from an IC engine, classified in class 422, subclass 168.
 - II. Claims 14-19 and 22-26, drawn to a method of purifying exhaust gas formed in an IC engine, classified in class 423, subclass 213.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used to treat steam boiler exhaust.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Scott W. Cummings on Nov. 15 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1754

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
